

NOTICE TO LYNN RESIDENTS: 2018 HYDRANT FLUSHING PROGRAM
April-May 2018

Please be advised: The Lynn Water & Sewer Commission will be conducting hydrant flushing between the hours of 6:00-10:00 pm during April and May, starting Monday April 9, 2018.

Rusty and dirty water may be experienced for a short time during and after flushing. If the water appears dirty, leaving the tap open for several minutes following flushing should clear the pipes. **Prior to doing laundry, residents are advised to check the hydrant flushing schedule.**

Hydrant Flushing Locations- Week 1 & 2

This program is necessary to clean the distribution system of residual materials that normally settle out in the mains during the year so as to ensure the delivery of better quality water during the coming summer months.
